

HD Squared Architects

Earth Day 2020

Today is the 50th Anniversary of Earth Day! Looking back makes us wonder, how will we each embark on the next 50 years?

HD Squared Architects approaches each day *Designing Resilience in a Changing Environment.*

We are passionate about creating functional spaces that enable our clients to thrive no matter what life sends their way. In each of our projects, we focus on:

- Adapting spaces to meet their changing needs over time, such as home offices, aging in place, single level living or multi-generational homes.
- Providing connections to nature that bring balance and a sense of peace to our lives.
- Sculpting sites to manage predicted sea level rise and the increased threat of flooding throughout the region.
- Improving buildings to use less energy, lowering operating costs and reducing reliance on energy production that damages our **EARTH.**

EARTH DAY
IS EVERY
DAY AND
ANYWHERE
YOU ARE

#EarthDay2020 4.22.2020 | Worldwide earthday.org

Resilience: the capacity to adapt to changing conditions and to maintain or regain functionality and vitality in the face of stress or disturbance. **Resilient Design:** the intentional design of buildings, landscapes and communities with practical solutions in response to vulnerabilities.
